Day 1 NHL UFA Price per Win

By [Hawerchuk](#) [@behindthenet](#) on Jul 1 2010, 6:17p [+](#)

I have twenty-three players changing teams today picking up contracts totaling \$46.15M in AAV in 2010-11:

# Players	Total 2010-11 AAV	Projected Wins	\$/Win
23	\$46.15M	17.4	\$2.65M

Using Tom Awad's Vukota projections, these players look to be worth 17.4 wins next season. Subtracting minimum salary gives us an average price per win of \$2.65M. This is a 20% increase over last season's overall UFA price of \$2.23M - but that figure includes players who re-signed with their old teams, and players who signed well after July 1. The ultimate cost of a win this year will no doubt be somewhat lower than \$2.65M.
